

# Anish Saxena

PHD STUDENT · GEORGIA INSTITUTE OF TECHNOLOGY

☎ (+1) 470-232-5725 | ✉ anish.saxena@outlook.com | 🏠 anish-saxena.github.io | 📺 Anish-Saxena | 📄 Anish-Saxena

## Education

### Georgia Institute of Technology

Atlanta, USA

DOCTOR OF PHILOSOPHY, COMPUTER SCIENCE · GPA: 4.0/4.0

2021 - present

- Advisor: Prof. Moinuddin K. Qureshi

### Indian Institute of Technology Kanpur

Kanpur, India

BACHELOR OF TECHNOLOGY, MECHANICAL ENGINEERING · CPI: 9.1/10.0

2017 - 2021

- Minor in Computer Systems

## Honors & Awards

2019 **Semiconductor Research Corporation (SRC) Member**, Indian Research Program

India

2017 **Aditya Birla Group Scholarship**, Awarded to 15 students selected from IITs and BITS

Mumbai

2017 **All India Rank 1828**, Joint Entrance Examination Advanced, 175,000 students

India

2017 **KVPY Fellowship**, Awarded by IISc Bangalore and Government of India

Bangalore

## Relevant Experience

### Memory Systems Lab, Georgia Tech

Prof. Moinuddin K. Qureshi

GRADUATE RESEARCH ASSISTANT

Aug. 2021 - present

- Designed a low-cost integrity protection mechanism for Page Tables against DRAM fault injection attacks.
- The work is under submission at the 49<sup>th</sup> International Symposium on Computer Architecture (ISCA 2022).

### NVIDIA Corporation, India

Mr. Bharatkumar Sharma

HPC GPU ADVOCATE INTERN, HACKATHONS AND BOOT-CAMPS TEAM

May 2021 - Aug. 2021

- Created open-source tutorials and bootcamps on multi-node GPU programming for HPC applications.
- Developed lab modules on profiling, CUDA-aware MPI, NVIDIA libraries, and communication topologies.
- Published all materials online; bootcamp is accessible at [github.com/gpuhackathons-org/gpubootcamp/](https://github.com/gpuhackathons-org/gpubootcamp/).

### Intel Labs, India

Mr. Anant Nori

RESEARCH INTERN, PROCESSOR ARCHITECTURE RESEARCH LAB

May 2020 - Sep. 2020

- Improved the performance of non-inclusive cache hierarchy by extending state-of-the-art cache policies.
- Extended a cycle-accurate simulator, collected memory traces, and performed functional simulations.
- Reduced simulation time by 10× while maintaining more than 99% correlation to a full-scale simulation.
- Devised Bloom Filter-based implementation to track parameters like reuse distance efficiently in hardware.

### CAR3S Group, IIT Kanpur

Prof. Biswabandan Panda

GROUP MEMBER AND SRC STUDENT MEMBER

Apr. 2019 - Jun. 2020

- Improved accuracy of attacks that exploit instruction execution latency variation due to processor caches.
- Identified that Dynamic Voltage and Frequency Scaling (DVFS) and OS scheduling affect execution latency.
- Introduced noise-aware calibration, periodic feedback, and victim profiling to optimize baseline attacks.
- Devised DABANGG, a novel set of refinements that enable precise, accurate, and noise-resilient attacks.
- Funded by NXP Semiconductors through SRC; the project is accessible at [car3s.github.io/dabangg/](https://car3s.github.io/dabangg/).

## Relevant Coursework

- Secure & Reliable CompArch<sup>A</sup>
- Topics in OS (Programming NVMe)
- High Performance Computing<sup>A\*</sup>
- Computer Organization<sup>A</sup>

A\*: grade for exceptional performance

- High Performance CompArch<sup>A</sup>
- High Performance Programming<sup>A</sup>
- Modern Cryptology<sup>A</sup>
- Data Structures & Algorithms

A: grade

- Parallel CompArch<sup>A</sup>
- Computer Architecture<sup>A\*</sup>
- Operating Systems<sup>A</sup>
- Non Classical Logic

## Projects

### Adaptive Rowhammer Defenses

Prof. Alexandros Daglis

MEMORY SYSTEMS LAB

Oct. 2021 - present

- Exploring the impact of Rowhammer defense guarantees on performance and hardware requirements.
- Extending the Linux OS scheduler to limit the running time of processes based on Rowhammer constraints.

### Scalable Fast Fourier Transform on GPUs

Prof. Mahendra Verma

PROF. VERMA'S GROUP IN COLLABORATION WITH CDAC AND NVIDIA

Feb. 2021 - Aug. 2021

- Extended Tarang, a parallel computational fluid dynamics simulator, to enable multi-node multi-GPU FFTs.
- Developed MPI and CuFFT-XT-based variable precision 1D and 3D scalable FFT implementations.
- Achieved upto 1650× single-node speed-up over FFTW on DGX-A100 and linear strong and weak scaling.
- Evaluated the implementation on DGX-A100 based PARAM Siddhi AI and V100-based EPCC Cirrus clusters.

### Efficient Memory Tracing for Mobile Architectures

Prof. Biswabandan Panda

CAR3S GROUP IN COLLABORATION WITH QUALCOMM RESEARCH

Jul. 2020 - Jun. 2021

- Developed a framework to collect Memory & Data Traces (MDT) natively and through emulation for Android.
- Modified QEMU, the emulator used by Android Studio, to collect MDT from Android 9.0 API with x86\_64 ABI.
- Extended Valgrind, a memory profiling framework, collected MDT natively from ARMv8-based devices.
- Extended ChampSim, a trace-driven simulator, and evaluated cache compression algorithms for LLC.

### Campus Sustainability Challenge

Team Leader

7<sup>TH</sup> INTER-IIT TECH MEET, IIT BOMBAY

Oct. 2018 - Dec. 2018

- Led a team of 6 to propose and implement solutions for waste generated on the institute campus.
- Mounted sensors in composting bins, captured Biogas, reduced PNG consumption in hostel messes by 14%.
- Configured an in-house E-Waste Management Software, analyzed disposal frequency, environmental and economic factors, and identified optimal combination of recycling techniques.

### E-Waste Management Software

Prof. Indranil Saha

COURSE PROJECT

Aug. 2017 - Nov. 2017

- Given E-waste disposal behavior and constraints on economic and environmental resources, identified the optimal path to safely and efficiently treat the E-waste.
- Modelled the path-finding algorithm from scratch, verified results for data-sets of up-to 4 million residents.

## Talks

2021	<b>CUDA Programming</b> , guest lecture, course on High Performance Computing	IIT Kanpur
2020	<b>DABANGG Attack</b> , via CAOS reading group to graduate students and faculty	IIT Kanpur
2020	<b>Microarchitectural Security</b> , talk and demo as part of SRC Annual Design Review	Bangalore
2019	<b>Flush-based Attacks</b> , guest lecture, course on Secure Memory Systems	IIT Kanpur

## Skills

<b>Programming</b>	C++, C, Python, Bash, Verilog
<b>Frameworks</b>	Pthreads, MPI, OpenMP, CUDA, NCCL, Intel TBB, ANTLR, Valgrind
<b>Utilities</b>	Git, $\LaTeX$ , GDB, PIN, QEMU, ChampSim, gem5, Xilinx ISE, Nsight Systems, Docker, Kubernetes

## Technical Service

2020	<b>Systems Reading Group</b> , Leader	IIT Kanpur
	Conducted series of talks to discuss basic and advanced topics in systems research.	
2019	<b>Programming Club</b> , Coordinator	IIT Kanpur
	Led a team of 24, conducted workshops, organized hackathons, and delivered lectures.	

## Miscellaneous

- Senior Mentor to 15 students at IIT Kanpur, helped them navigate life and career choices in college. 2020
- Represented CAR3S group in departmental seminars and maintained the group's digital presence. 2019, 2020
